

FLO KING VENT HOSE FOR BX650 & BX1200

This polypropylene Vent Hose, available only for the BX650 and BX1200, may help increase motor life in hot, corrosive situations. The 3-foot-long (1-meter) hose draws cooler, cleaner air from outside the tank. This allows the motor to run cooler and also reduces the effects of hot, corrosive chemicals on metal motor parts.

Or Make Your Own Vent System

Here is a do-it-yourself idea: Fabricate your own chemical-resistant plastic ductwork to fit your Flo King pump motor.

Note: We do not sell either the plastic or the finished ductwork.
